- (A) Part of Ox Bel Ha Underwatercavesystem
- (B) From Entrance to first Airbell in a sidepassage (Sumplength 1720m)
- (C) Longest sump of Italy
- (D) From Barrage SEM to max.Penetration (-172m) Seaentrance to max P. = 2352m
- (E) Part of Dos Ojos Underwatercavesystem
- (F) sump number 3 :Hugh Morrison explored this sump 1983 to 1784 meters. Chris Brown added the final 25 meters and was stopped by a restriction in 1995 at the point 1809meters. Karl Hall reached same point 2003 and was stopped by the same restriction.
- (G) N6 to Riviere Bidon
- (H) N6 to Affluent du Reseau
- (I) Part of Cenote Pitch downstream (aval)
- (K) sump number 2

- (L) Worldrecord for a Traversedive between 2 Entrances from Turnersink to Wakullasprings by Jarrod.Jablonski and Casey.Mc Kinlay.(15./16.12.2007)
- (M) sump number 2
- (N) This sump is dived to approx.2012meters /6601 ft. by Kim Martin. The 1753m/5751 ft. dive by D.Sawatzky is topographed.
- (O) Worldrecord for a single penetration and returndive.
- (P) Traversedive, Connection of 2 Caves.
- (Q) Tiefe am Umkehrpunkt -35 Meter . Depth at point of return -35 meters.
- (R) Tiefe am Umkehrpunkt -62 Meter . Depth at point of return -62 meters. Divetime 17 hours 30 minutes.
- (S) Part of Beacon Woods cave system.
- (T) The total length of sump 2 is 2656 meters. The first airchamber is 15m before submerging. The following air chambers are roof sniffs. The final chamber before Toadhall is 53 meters long. Sumplength ignoring roof sniffs is 2561 meters.
- (U) Part of Old Bellamy cave system.
- (V) Approximately maximum upstream penetration by James Toland and Doug Chappell is 6500 Feet/1981 meters. Confirmed and surveyed maximum penetration by Sheck Exley is 5335 Feet / 1626 meters. The approx. 6500 ft. penetration has not yet been surveyed.
- (W) upstream.
- (X) sump 3

Sac Actun (including Nohoch Na Chich) Cavesystem has currently no underwater-cavepassages without airbells or surfaces which are longer than 1500 meters / 4921 feet.
